Date: 01/14/2025 - First Meeting

→ learnt about different subteams

- 1) Identifying Connections → bringing a group of people
- 2) Facilitating Interactions → building a lasting connection between and among users
- 3) Managing Resources → reddit for materials/advice on classes.

Decision → Facilitating Reactions

Date: 01/21/2025 - Slack Huddle (Division of Tasks + Action Items)

Action Items

- Backend Plan (Framework) } MVP
- Frontend Figma Mock up. } (Minimal viable product)

Idea: Working on a way to generate ice breakers

BACKEND

→ TASK DIVISION:

- Creating the prompt to generate Ice Breakers (Prompt Engineering) → JADE
- Create Sample Personalities → stakeholders for the project → CHLOE
- Creating github repo and adding code to connect Chat GPT API to given information from Personalities  
↳ ME

## FRONTEND

- Work on Figma models
- Try to reach out to Identifying Connections in time.

## Final Plan

- ↳ Focus on backend
- ↳ Supplement backend with Front end.

Imp. Dates : Feb 11<sup>th</sup> → DEMO.

Date : 01/28/2025 - In class meeting

- Discussion on prototype testing for the subteam.
- Individual work: Work on code for backend, generate API Key and create query-chatgpt function.
- Prompt generated, use it to generated ice breakers
  - ↳ refer to common google doc for it.

Date : 02/04/2025 - Guest Speaker + Discussion.

- look at Presentation on slack.
- MVP mindset
- API tokens → Groq, Jitler, Label studio.
- Next Week: Finish up backend, fix version errors. Try virtual environment setup.

Date: 02/11/2025 - Demo (Mid semester)

→ We presented our prototypes and MVP's

→ Feedback to work on:

- AI should automatically put the prompt instead of the user being the person to click

[It could potentially be related to exam timelines / assignments etc]

- Test with words etc.

- Have the AI block out names.

Connections → Algorithm to generate groups of different sizes with user input.

Managing Resources → AI analysis post on a given topic.

Uses sentiment analysis for effectiveness of a response.

Date: 02/18/2025 - Test Plan

→ went over the test plan and decided ways to improve it

→ Feedback:

- "correct" prompts mean? → accurately uses profiles' details and interests to generate icebreakers.

- Before starting the testing, add new questions to help get some qualitative feedback

- Need to test UI

Individual work: \* Help come up with questions to ask for genuine feedback.

\* Goal of at least 5 people to fill out both forms once ready.

Date: 02/25/2025 - Absent

→ cross check with team about discussion.

Individual work: \* continue to get people to fill out the form,

\* Talk to people about it.

Some verbal feedback I got:

→ do people want to connect only based on interests, would common academic questions help engage better.

Date: 03/04/2025 - Testing Results Demo

→ We presented our testing plan and the results

→ Feedback we received:

- Have 2 sets of prompts → hobbies/interests and

academic coursework.

- Get more user information to generate prompts based on classes / homeworks / syllabus / schedules.
- User's can have a choice to choose between interest based prompts v/s course based prompts.
- Maybe have a bank of set icebreakers that are generic ones that have higher engagement.

Date: 03/11/2025 - Plan for Final Presentation

→ New Goals:

- create a new prompt that focuses on user's classes
- add more info to the dummy data about user's class schedule etc.
- Idea to include an introductory blurb for each user.

Date: 03/25/2025 - Absent

→ cross check with team about discussion

Individual Work: Help in the new prompt generation for the user's classes etc.

Date: 04/01/2025 - Final Presentation prep

→ Work on final presentation slides

→ Try to rework Figma

→ Slide allocation per person.

Date: 04/08/2025 - Absent

→ cross check with team on discussion

Individual Work: rework the slides and review them.

Date: 04/15/2025 - DEMO Day!!

→ We presented our final DEMO's to guests and every one on our team

→ Feedback we got:

- Use chat History to generate future prompts and interactions.
