

8/26 Class HW:

Homework: Find AI or crowdsourcing tools that help job seekers:

- Translate their skills into a resume format
- Find appropriate job opportunities
- Post your findings in the class channel with a couple of bullet points explaining:
 - Why/how the tool is interesting from an AI or crowdsourcing perspective
 - How it helps with the job-seeking journey

My Response:

Hey all! These are the tools that I found:

- [Enhancv.com](https://enhancv.com)
 - It's an AI-powered platform for building resumes, tracking applications, and practicing interviews
 - Contains all features on one simple and intuitive dashboard
 - **This is interesting** as it combines multiple AI-driven features into one UI
- [Resumefromspace.com](https://resumefromspace.com)
 - An LLM-based tool that tailors your resume to specific position requirements and to catch recruiter attention
 - Provides an AI interview trainer with personalized questions and customized feedback
 - **This is interesting** as it automates personalized resume tailoring using AI and crowdsources data from various sources to provide feedback to the AI in order to tailor it

9/2 - Sick; wasn't able to attend VIP

9/2 HW Response:

MAPP (Motivational Appraisal Personal Potential) Career Assessment –

- A short online assessment (~15 minutes) that measures your motivations and matches them to over 1,000 career options.
- Gives personalized career suggestions based on your strengths and preferences.
- How it uses AI/Crowdsourcing: Uses data from thousands of completed assessments to compare your answers with other users and match you to careers where people with similar profiles thrive.

Career Thoughts Inventory (CTI) –

- A self-assessment that helps you identify negative or confusing career thoughts that might hold you back.
- Comes with a workbook to guide you through improving your decision-making and career planning.
- How it uses AI/Crowdsourcing: Uses data collected from past participants to benchmark your results against common thinking patterns, helping provide insights and strategies for better career decisions.

9/9 – In-Class Mind-Map Workshop

We created a **mind-map** around “Career Readiness for Military/Veteran Spouses.”

Main Branches:

- **Know Yourself –**

- Individual assessment tools: DISC, Myers-Briggs, Strong Interest Inventory, MAPP.
- Concerns about personalization → live experts may be better than online tools.
- License portability (important barrier for spouses in regulated professions).
- Childcare and other life-balance factors.
- **Crowdsourcing –**
 - Challenges of “putting people in buckets.”
 - Incentives and recognition for mentors/peers.
- **AI Tools –**
 - High5Test: personality/strengths-based.
 - Crystal: crowdsources insights from LinkedIn to predict communication style.
 - PitchMeAI: uses text/voice transcription to tailor resumes.
 - Concerns about bias in tools and recruiter screening.
- **Personas –**
 - Need to think about “who we’re trying to help.”
- Our team (me, Cyrus, Cat) decided to focus on a mentor–mentee service for veteran spouses:
 - Aims to connect spouses with mentors who can train and link them to job opportunities.

9/16 VIP -

Before class HW: map out app

Our plan:

Military Spouse Mentor Contact

Branch Affiliation
☐ Army ☐ Air Force ☐ Navy ...

Have You Been Mentored Before?
☐ Yes ☐ No

What are your main goals?
☐ Career Guidance ☐ Relocation Supp.
☐ Education ☐ Coping
☐ Children ☐ Networking ☐ Other

What has been most challenging for you?

Preferred Communication Method
☐ Phone ☐ Video Chat ☐ In-Person
☐ SMS

Here is your list...

Practice ☐ Filter ☐

MENTOR: Sarah W
 10+ years spouse, Army
 ★★★★★ (15)

MENTOR: James T
 6 years spouse, Navy
 ★★★★★ (4)

MENTOR: Maria L
 11 years spouse, Army
 ★★★★★ (9)

MENTOR: John C
 1 years spouse
 ★★★★★ (1)

AI CHATBOT

Hi I'm here to help! What do you need today?

[User response here]

Great! Here are some resources I found:

Practice interview questions Improve English Find resources

+ Ask anything...

Sarah W Profile

Branch Affiliation: Army

Supports: ☐ Career Guidance
☐ Coping
☐ Children Support

Meets on:
 Video Call: M-T-W
 9:30 AM - 2 PM

☐ ☐

Military Spouse Mentor Contact

Your Mentor

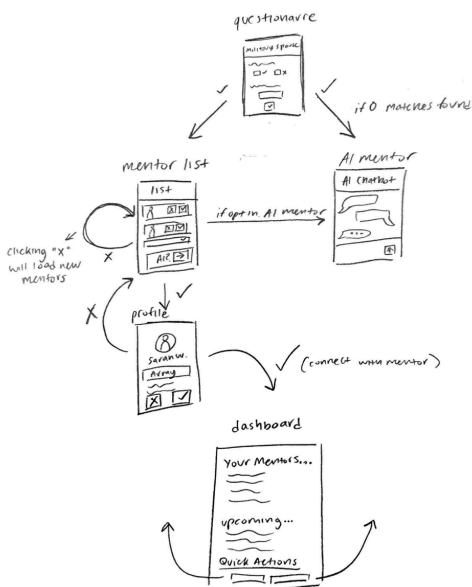

Matched with Sarah W.

Branch: Army

Topics: Career Development, Coping, Children Support

Upcoming
 Call with Sarah: Sept 22, 9:30 AM
 Workshop for resume: Sept 25

Quick Actions

Continued building on earlier discussions about group structure and project development.

Connection to Other Teams: Identify how your project interacts or complements others.

Crowds:

Who are you building for?

What defines those crowds (e.g., veteran spouses, mentors, moderators, employers)?

Research:

Explore existing tools (especially those relevant to mentoring and career support).

Examine social tools that can be integrated into the platform.

User Personas: Build detailed scenarios for target users.

Tech to Explore:

Focus on how to use AI effectively.

Compare LLMs vs Neural Networks vs Clustering vs other algorithms to understand strengths and best fit for tasks.

9/23 -

- Presented where we are looking to move in the future of our application
- Want to move the sole focus towards the AI aspect of the mentor:
 - Improving general skills
 - Interview practice, language improvement, etc.
- emphasized the importance of exploring multiple AI approaches instead of jumping straight into LLMs
- **Key Takeaways for Our Team**
 - Focus on matching mentees to mentors → explore both clustering and NLP-based recommenders.
 - Start with public datasets to build prototypes and test models.
 - Use PACE resources early to run experiments at scale.

- Document metrics and results to inform future model selection (e.g., whether or not to move to LLM-based recommenders).

9/30 - was not present
