

Meeting 1: Overview

Notes:

- Translating experience into resumes
- Military spouses often feel like they haven't been able to
- Career Development Model

Assignment: Research tools that could best help military spouses search for jobs and transform them into optimal candidates

These are the tools I found:

[Career.io](https://career.io)

Provides resume & cover letter templates and AI assistance

Has a job application search engine and a built-in application tracker

Provides AI interview simulations similar to BigInterview

Has a career advice section and

Pros: Beginner friendly, I really like the job search engine and application tracker

Cons: a lot of tools are not free which is unfortunate

DearHassle

Generates tailored cover letters, follow-up emails, and LinkedIn messages

Tailors resume to job description to ensure relevant content is highlighted

Can be directly added to device

Built with OpenAI

Con: requires a little familiarity with using the Terminal which might not be our target audience's skill level

Pros: Free and Open Source

Cons: Technical familiarity required

Meeting 2: 08/26

Notes:

- THRIVE Rundown
 - Challenges military spouses face against employment:
 - Recognizing their potential:
 - Articulating their value
 - Overcoming misconceptions
 - Relocations, unpredictable schedules, and family demands
 - Lack of childcare, reliable transportation, and long commutes

Assignment: Find an academic article that researches military spouses and jobs, post it in slack
Research a tool someone else found (hiringOurHeros.org) and create a tutorial on how to use this tool

09/02/2025

These are my findings:

Book: **The Military Family: A Practice Guide for Human Service Providers**

By James Martin, Leora Rosen, Linette Sparacino

[Google Book](#)

Chapter 6: Military Spouse Employment: Challenges and Opportunities

- Talks about the male military spouse
 - More likely to be military also or past military
 - Civilian is a small subset
 - have higher educational levels, prior military service experience.
 - employed full time or are seeking full-time employment
 - often excluded from discussions of spouse employment issues
- Military carries a stigma: employers are unwilling to dedicate time and training to someone they perceive as short-term
- Spouse employment → spouse support → military retention & readiness (pg 96)
- Department of Defense has employment initiatives that address barriers such as

Area	Department of Defense	Installation	Self-Help
Education and Training	Provide job training Create partnerships with colleges and technical schools for education and training for military spouses Establish programs to provide scholarships, grants, and loans for education and training Create policies for home-basing that support training and employment opportunities	Work with local community and business leaders to create positive attitude about military spouses Create partnerships with local colleges and technical schools to provide education and training for military spouses Support spouse job referral programs	Develop an optimistic attitude Take advantage of educational and training opportunities Set realistic goals for education and training

Childcare	Build/increase size of childcare centers and set affordable rates Establish and monitor policies for quality home-based child care	Operate centers so they provide quality childcare and required operating hours	Utilize the various childcare services available on the local installation
Relocation	Create policies to make homebasing possible	Provide effective sponsorship for all new families	Make an effort to learn about the new community
Jobs	Establish policies and programs that encourage military and civilian partnerships	Establish mechanisms to create positive community attitude about military spouses as employees Facilitate opportunities for spouses to create employment-related support networks	Have optimistic attitude Actively pursue possibilities Create and access employment-related support networks
Transportation	Create policies and programs to form community partnerships for public transportation	Create community partnerships for helping families access public transportation and financing for vehicles Institute programs for financial counseling	Utilize public transportation and financing of vehicles Become informed consumers before making vehicle purchase or prioritize finances

hiringOurHeroes.org

1. **Complete the Career Connector Intake Form**
 - a. Go to the Career Services tab
 - b. Click Start Here
 - c. Click the Get Started button
 - d. Fill out the survey to be connected to a Career Connector
2. **Create your resume**
 - a. Go to the Resources tab
 - b. Click Digital Tools and scroll
 - c. If you're a service member or veteran, use **Resume Engine**.
 - d. If you're a military spouse, try **Career Spark**
3. **Join upcoming hiring events or webinars**
 - a. For webinars
 - i. Go to the Resources tab
 - ii. Click Webinars
 - iii. Scroll through and find one that interests you
 - b. Hiring Events
 - i. Go to the Career Services tab
 - ii. Click Hiring Events
 - iii. Click Register
4. **Explore fellowships**
 - a. Go to the Career Services tab
 - b. Click Fellowships
5. **Browse the job board**
 - a. Go to the Career Services tab
 - b. Click Job Board
6. **Use webinars, digital tools, and resources**
 - a. Go to the Resources tab
 - b. Click Digital Resource Library or Research for more info

Why does it work?

- Audience is specifically for military spouses
 - Meets them where they're at
- Hands-on learning
-

Meeting 3: 09/02

PACE ICE

- Partnership for an advanced computing environment
- Supercomputer
- Help solve problems that are too big or too long

- ICE Cluster
 - Instructional cluster environment
 - Head Node
 - Your own workspace
- How to login: ssh user@login-ice.pace.gatech.edu

Look for tools that help assist

- How are they using AI

Develop two ideas for how we can use crowdsourcing or LLM in the stage of knowing yourself

09/08/2025

High5 Test

- High5 is a strengths test for individuals, teams and organizations to identify what motivates and energizes them. High5 reports development insights, weaknesses as watch-out areas, best partner recommendations, and career path suggestions.

How it uses AI/Crowdsourcing:

- The test is built on crowdsourced data and AI. It compares your answers against a database of other users to determine what makes you statistically unique. It uses AI to analyze this data and identify your top 5 strengths.

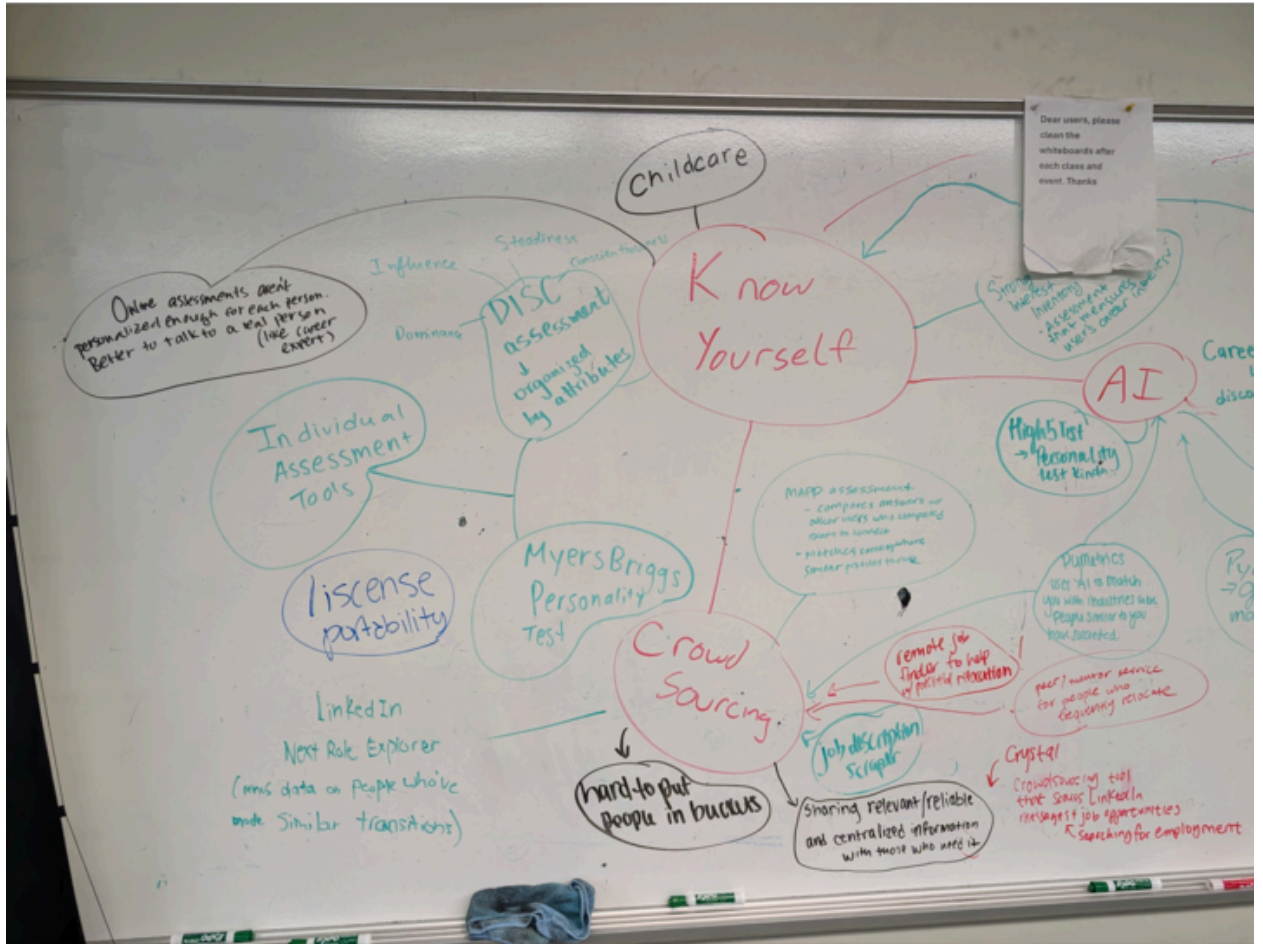

The Enneagram Test

- This test is a personality typing system which describes people in terms of their core motivations, desires and fears. This test helps people to better understand what drives them and how to harness their natural strengths.

How it uses AI/Crowdsourcing:

- Crowdsourcing is only used for added context after you get your result, for example, by showing you common careers for your type based on other users' data.

09/09/2025

09/16/2025

- Things to consider in our group for this week:
 - Roles
 - Connection to other teams
 - Crowds - when more than 2 people are involved
 - What crowds are you building
 - What defines those crowds
 - Research
 - Value branding, other social resources, what type of resources would a mentor use.
 - What type of tools already exist, chatting tools, chatgpt
 - User personas

18

- Think of individuals we are trying to help, what signifies who they are, how they are different.
- Female vs male, younger vs older, with children, without children
- Tech to explore
 - How to use AI

-

09/21/2025

- Group Write - Up:
https://docs.google.com/document/d/1EUgscd6j-4BPq9o2_BFp5OcnV8fkwwj4hHPAGhDAUsA/edit?usp=sharing

- My role: Connections Lead – manages how our prototype ties into other teams’ tools and ensures integration with the “crowds” aspect.
 - Considerations — How are they connected
 - Other projects:
 - **Crowdsourcing Tool Prototype:** Their tool allows users to create profiles and connect with others who share similar goals. We could integrate with it by letting spouses crowdsource advice, job leads, or peer support while still having access to a dedicated mentor. Our app could feed into their profiles so mentors’ notes and resources flow into that community space.
 - **Mentor-Centric Prototype:** Since their design also centers on career mentorship, we could align by differentiating roles. Our prototype emphasizes personal identity and confidence building before careers, while theirs might focus on career pathways directly. Linking the two could create a holistic journey: start with rediscovering self, then transition into targeted career mentorship.

09/23/2025

- Goal: Create a more detailed and structured prototype with ideas from write up. also consider feedback notes at the bottom of write up while we craft it

09/29/2025

- Focus: Figuring out how to match mentors and mentees (with P.A.C.E)
 - Notes
 - What questions can be asked
 - Around 7-9, not too much
 -
 - PACE
 - Process:
 - **Collect profiles**
 - Mentees: “I want to work in healthcare,” “I’m available evenings,” “I’m at Fort Benning.”
 - Mentors: “I have 10 years in nursing,” “I prefer video calls,” “I’m in Atlanta.”
 - **Turn that info into data**
 - Write it down in a structured way (like a form → database).
 - Maybe also text (bios, goals)
 - **Compare mentees and mentors**

- Create an algorithm to measure how similar their goals, skills, or locations are.
- Add filters for must-haves (e.g., availability, industry).
- **Use PACE for the heavy lifting**
 - Generate embeddings (turn words into vectors/numbers).
 - Run similarity searches across hundreds or thousands of profiles.
 - Train models to improve matching quality as you collect feedback.
- **Get matches back**
 - PACE gives candidate lists, scores, and explanations → Wechooses top match

collect → compare → compute (with PACE) → present matches
